## The Industry's Publication of Record for Nearly a Century

Since *Public Utilities Fortnightly's* first issue in 1929, decision makers in the U.S. power and gas industry have relied on the *Fortnightly* for in-depth, objective analysis. Our expert writers and editors deliver cutting-edge analysis across the full range of industry issues, from bond ratings to interoperability standards.

Our authors include the industry's foremost policy analysts and thought leaders, such as Ahmad Faruqui, Nora Brownell, Charles Cicchetti, Jonathan Lesser, Robert Malko, Susan Tierney, Peter Fox-Penner, Richard Rudden, William Brownell, Roger Bezdek, James Seibert, Richard Tabors, plus our very own Bruce Radford, John Bewick, and Michael Burr.

Our annual special reports, like the *Fortnightly 40* and the Utility ROE Survey, provide vital data and analysis that you can't get anywhere else—at least not without paying tens of thousands of dollars for custom research. And *Fortnightly's* monthly Transactions column, as well as the Utility Finance and ROE Survey Databases on [Fortnightly.com](http://Fortnightly.com), provide a wealth of current and historic information on utility finance and regulation.

Put it all together, and your *Fortnightly* subscription is the best investment you'll ever make toward understanding industry trends. But don't take our word for it. Here's what a few readers had to say about *Public Utilities Fortnightly*:

**"Indispensable source of in-depth information and insight. A good barometer of what's relevant and important."**

— Terry Boston, CEO & President, PJM Interconnection

**"Consistently great source of timely, solid information on the utility industry."**

— Greg R. White, Commissioner, Michigan PSC

**"The most thorough coverage ... depth no other industry publication can match ... no agenda other than professionalism."**

— George Loehr, Executive Committee Chairman, New York State Reliability Council

## Utility Regulatory News

**U**tility Regulatory News (URN) is a weekly newsletter providing timely coverage of regulatory topics at the state level that can't be found anywhere else. From Alaska to Florida, from Hawaii to Maine, you will find concise reporting that puts orders from state public service commissions and state courts into perspective. Although URN concentrates on state-level regulatory decisions, it also tracks federal court and administrative agency proceedings as well.

The leader in the field of utility regulatory law, URN stands in a unique position to keep its readers informed on pressing matters confronting both utilities and regulators. Our editorial staff of attorneys has in-depth knowledge of utility law in association with PUR's well-known case reporter, *Public Utilities Reports, 4th Series*. This staff conducts a weekly survey of the many decisions issued by state commissions and courts from around the country and identifies those of the most importance. Key points from those specially selected cases are then delivered in a newsletter format directly to your desktop once a week.

The regulation of public utilities has become increasingly complex, and URN is there to help keep readers informed of breaking news, policy developments, and regulatory trends for all

industry sectors: electric, natural gas, telecommunications, and water. From revenue decoupling to renewable portfolio standards to service reliability and more, URN allows you to remain abreast of recent regulatory decisions from throughout the United States.

Whether you are interested in mergers and acquisitions, rates and ratemaking, quality of service, or smart grid deployment, URN is sure to have information you might not see elsewhere. With no agenda other than to provide timely and accurate reporting of the decisions that matter, you can rely on URN to offer both the overview and the details you need to keep up-to-date with the latest thinking at regulatory agencies.

# Public Utilities Reports, 4th Series (PUR4th) The Authority On Utility Law

Since 1915, *Public Utilities Reports (PUR)* has set the standard for national case reporting of court and commission decisions pertaining to the field of utility regulation. *PUR4th* brings you full-text coverage of important and precedent-setting decisions by state public utility commissions, as well as related court decisions, covering the fields of electricity, natural gas, telecommunications and water.

Edited in accordance with the highest standards of the legal publishing profession, *PUR4th* is the preferred authority on regulatory law. The eight hardbound volumes of *PUR4th* published each year provide:

- the full text of hundreds of regulatory commission decisions, together with case synopses, headnotes, and other editorial enhancements.
- a digest containing headnote references to significant legal and regulatory issues arising

- in the cases published in a given volume.
- a cross-reference index directing the user to the appropriate section in the PUR taxonomy for information on a particular subject.
- a case summary table that highlights the importance of each reported case.
- case tables organized alphabetically and by jurisdiction.

Subscribers to the eight-volume *PUR4th* will receive an additional volume each year, a hardbound digest containing all of the headnotes from the eight volumes reported in *PUR4th* during that year, organized according to the PUR taxonomy of utility law topics. It also includes an alphabetical Table of Cases, a Table of Cases by Jurisdiction, and a Case Summary Table.

**Annual Subscription: \$1795.00.**

**25% discount available with purchase of PURbase DVD (see page 6).**

## PUR Digest, 4th Series

The *PUR Digest, 4th Series*, is the comprehensive research tool for the *PUR* case reporting system. The headnotes, case tables, and indexes in this essential reference will shorten research time by directing users to the specific cases relevant to their interests.

The *Digest* and its supplements include references to the thousands of court and regulatory commission cases reported in *Public Utilities Reports, Fourth Series (PUR4th)*. Because it provides quick access to points of law from nearly 40 years of utility proceedings, anyone involved in the regulation of public utilities will find the *Digest* to be an invaluable and indispensable tool.

The *Digest* has a unique multiple indexing system, enabling researchers unfamiliar with *PUR*'s classification scheme to find cases via an alphabetical, cross-reference index containing commonly used words and phrases as well as terms of art. It also provides tables listing the cases reported in *PUR4th* alphabetically, by jurisdiction, and by docket and/or case number.

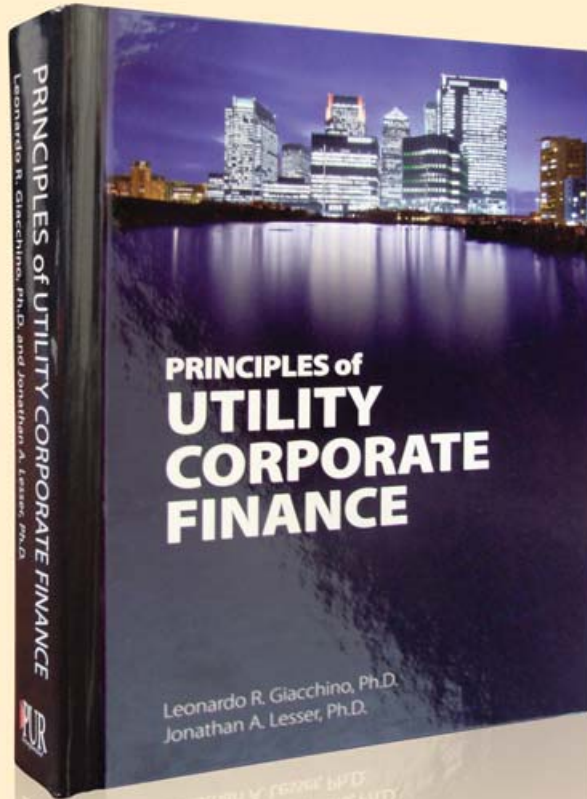

**7 Hardbound Digests & Supplements to date: \$895.00**

An annual update of this product is available. These annual update supplements include all headnotes, case tables and index for the previous calendar year. **Price: \$125.00**

## Going Green and Getting Regulation Right: A Primer on Energy Efficiency

BY CHARLES J. CICHETTI

**M**any states, along with an increasing number of self-regulated government- and consumer-owned electrics, are now engaged in mandatory utility-sponsored energy efficiency and demand-side management programs. This book explores the important lessons that can be learned from earlier mandated conservation efforts and will be a valuable resource for regulators, other policymakers, utilities, and intervenors.

*Going Green and Getting Regulation Right: A Primer for Energy Efficiency* uses a vast database of results from utility programs throughout the nation over the past 15 years to address these matters quantitatively. These analyses are complemented with a thorough qualitative and institutional review of the differences found across the nation and over time.

BY DR. MICHAEL R. SCHMIDT

Many states have instituted some form of performance-based ratemaking (PBR) for utilities. There is no question that other states will follow soon. In this publication, Dr. Schmidt presents an exhaustive study of PBR, providing you not only with the policy aspects of the subject, but also with the mechanics of designing and implementing this important regulatory tool. *Performance-Based Ratemaking* provides the roadmap for prospering in the increasingly competitive retail energy markets. Discover the challenges and opportunities associated with PBR—including the significant benefits for investors, regulators, and customers.
