

Edison Electric Institute's International Luncheon

EEl continues to expand its international reach through multiple initiatives under its charismatic VP – International, Dr. Lawrence Jones. More member utilities from beyond the U.S., interns from these utilities serving at EEl, and more information-sharing across borders.

And the annual International Luncheon. We were fortunate to get an invite, along with utility and government representatives from around the globe.

This year's keynote speaker was futurist Duncan Stewart, Deloitte's extraordinary director of technology, media & telecommunications research.

Another popular speaker was Edison-Tesla, a robot who has a lot to say about the industry's history and future, with a sharp sense of humor.
